Nipuna Gunathilake

// Job objectives & career goals

My ultimate goal is to be proficient in a set of skills that would be valuable to the organization I work for. I would like an opportunity to use the skills I've gained at university and at other places to the maximum use.

I'd like to work in a team environment where I could contribute with my existing skill and gain new skills. Having exposure in a dynamic software engineering firm with exposure to talented people working with new technologies would be ideal.

// Work Experience

2014-2015 **Bank of Ceylon** Software Engineering Intern
July - Feb

Worked on an Mobile (Android Hybrid) Application and an SMS mobile banking application and the associated backend RESTful web services while at the Bank of Ceylon. PhoneGap was used for the Android Application and the web services were done with Java and Jersey.

2013-2014 **IFS** Software Engineering Intern
Nov - Mar

Worked on Windows Phone and Windows Metro applications while at IFS, Sri Lanka. Worked as an Software Engineering Intern at IFS for 5 months. Worked in the Research and Development team. Developed mobile applications for the Windows Platform using .Net technologies. Windows 8 Metro application and a Windows Phone 8 application.

// Education
